PROJECTS & TRAININGS

Mail Aggregator

<https://github.com/amita-shukla/mail-aggregator>

The Mail Aggregator is a single page web application that presents a user's emails from multiple email ids under a single view. It acts as a very handy tool for managing multiple email accounts.

- Backend: **JAVA, Singleton Design Pattern**, JavaMail API
- UI: HTML, JavaScript, AJAX, JQuery, Bootstrap
- **REST based Web Services**
- Database: MySQL

International Football Association

<https://github.com/amita-shukla/football-association>

The project provides a portal for the International Football Association (for the public as well as the admin) to display scores and rankings, update match schedule, add players' details and add/delete team for an ongoing tournament. It is based on **J2EE, MySQL** on the backend and **HTML, CSS** on the frontend.

LISA! Media (Internship)

Part of a developing team consisting of three students and was developed the web application project LISA! Calculator, a platform that displays multilingual content on the basis of domain (<http://lisa-rechner.de>). This included writing programs for the demanded calculators and implementing the site on an amazon server. Developed frontend and backend as well as an admin panel for the page.

- Programming Language: PHP 5.5x (Laravel 4.2 Framework)
- Database: MySQL 5.5
